ELECTRA-RIDE II

Enjoy

Your lifestyle doesn't have to be limited by stairs. Enjoy your home, just the way you always wanted to!

Freedom

With the Electra-Ride II, you can go up and down stairs effortlessly, anytime you want to. Electra-Ride II gives you the freedom to live a full life.

Security

Since the Electra-Ride II is battery-powered, you can always get up or down stairs, even if there's a power outage. You can rely on the charge stored in the unit to get you to the top or bottom of the stairs.

Comfort

Unlike ordinary chain or cable driven stairlifts, Electra-Ride II uses a rack and pinion system, so there's no slipping or lurching when the unit stops and starts. Your ride is smooth and controlled. Wright & Filippis can even set the speed to suit your own comfort level.

Battery-powered

Less Costly

Electra-Ride II is simpler and less costly to install than other units because with battery-power you don't need to install additional outlets.

Convenient

Electra-Ride II's compact size ensures that friends and family can use your stairway, even after the unit is in place.

Certified

Electra-Ride II meets all ANSI-A-17.1 residential requirements and public building specifications with the optional commercial package.

Full Value

Electra-Ride II is complete with a full list of standard features. Similarly priced units either don't offer these items or they are shown only as extra cost options. Remote call/sends, 45° and 90° seat swivel at both the top and bottom of the stairs, adjustable, swing out arms, a 350 lb. rider capacity are all included.

ELECTRA-RIDE II STAIRWAY ELEVATOR SYSTEM

ELECTRA-RIDE SRE-1550 SPECIFICATIONS

EXCEPTIONAL VALUE

- 45° and 90° locking swivel seat, at the top and bottom of the stairway.
- Two remote, wireless call sends and batteries included at no additional cost.
- Adjustable seat width.
- Footplate and carriage safety sensor. Retractable seatbelt.
- Charging station indicator lights at the top and bottom of the stairway.
- On board diagnostics make service easier and more precise.
- Meets all ANSI-A-17.1 residential requirements.

BATTERY-POWERED TECHNOLOGY

- Ensures access, even during power outages.
- Powered by two 12 volt batteries, continuously charged by a state-of-the-art battery charger that plugs into any 110 volt household outlet.
- Requires no special wiring.

CONVENIENT INSTALLATION

- Rail width of 7.5" and folded width of only 13"
- Can be installed on either side of the stairway, with no modifications.
- Standard track lengths of 16' and 20' available. Custom length rails can be ordered as an option.

COMFORT

- Seat height is adjustable for easier entry/exit at the top and bottom of the stairway.
- Seat is contoured to provide optimum support.
- Custom seating and seat coverings available.
- Seat coverings meet California Flammability Regulation 117-75 Sec E.

SMOOTH, POWERFUL DRIVE SYSTEM

- Self locking worm gear, rack and pinion drive.
- Maximum rider weight of 350 lbs.
- Soft start, solid state controller provides smooth starts and stops.
- Adjustable speed control makes it possible to adjust the speed of the unit to the weight of the rider.

SIMPLE INSTALLATION

Installation of your Electra-Ride II by Wright & Filippis is simple and easy since the unique battery-powered system needs no special wiring. No time or money has to be spent for additional electrical service. The overall design of the Electra-Ride II system requires less time to prepare for set-up and reduces the actual on-site installation time. You can enjoy your new stairlift with a minimum of inconvenience and expense.

FLEXIBLE SEATING

The Electra-Ride II was designed with a fully padded seat that is very compact, to provide both comfort and the least obstruction of your stairway when folded. Features include armrests that swing out to permit easier transfer. The armrests can also be adjusted for width, so you can custom fit the seat for your individual needs. Convenient release levers allow you to change seat parameters, quickly and easily.

RELIABLE OPERATION

You'll always be able to get up and down stairs because Electra-Ride II uses battery-powered technology. This means Electra-Ride II will continue to operate, even if electrical service is interrupted. Electra-Ride II also features LED lights at the end of the rail to give you visual assurance that the charger is engaged. These LED's also provide illumination of the stairway in a darkened hall, making it easy to locate.
