## Inclined Platform Lifts

**PROVIDE SAFE, CONVENIENT ACCESS FOR ALL**

*Since 1944, Wright & Filippis has been an industry leader in providing barrier-free design with reliable, quality service. Our entire line of inclined platform lifts offer quiet, smooth rides and the reliability which makes them synonymous with Wright & Filippis.*

From single family private residences to public commercial facilities, Inclined Platform Lifts provide safe, convenient access for everyone. Adaptable to nearly all installation applications, these lifts are long-lasting, affordable and surprisingly easy to install.

Inclined Platform Lifts provide you with the ability to ascend or descend any staircase with ease. They are uniquely designed to escalate around your accessibility problems, accomplishing what most would view as an impossible goal. No matter what the application - indoor, outdoor, straight or curved stairways, Inclined Platform Lifts can work for you!

## SAFETY

The **end ramp** locks firmly into place in the up position when the lift is in use.

**Unique hand control** with emergency brake release lever allows the unit to drift down safely in the event of a power failure.

All IPL's are equipped with **Under Platform Obstruction Safety Sensors** that stop the lift should it encounter an obstruction on the stairway.

SAFETY

## CLEVERLY CONCEALED

Just because a wheelchair lift is a necessity doesn't mean it necessarily has to be an eyesore.

For example, all of the lift's working mechanisms have been **cleverly concealed** to provide a more attractive, sleeker appearance.

CLEVERLY CONCEALED

## NARROW RAILING

The lift attaches directly to the top and bottom stair treads. Heavy gauge rails use just 4" of the stairway on either side. No anchoring to the wall is required. With a special built-in lowering system and power outage safety features, Inclined Platform Lifts provide maximum rider safety.

NARROW RAILING

## SIMPLE INSTALLATION

Inclined Platform Lifts are almost as **easy to install** as track lighting for Wright & Filippis. We will have your lift installed and running in a short period of time.

If door frames protrude, the lift's guide unit can be moved to clear it. The power unit can be located just about anywhere it's convenient and out of the way, such as through a wall.

SIMPLE INSTALLATION
