

...Road Test the C-Leg and Compact

You may have heard about the Otto Bock C-Leg Microprocessor Knee from your prosthetist. Or seen it in news coverage about soldiers returning from Iraq. Or read about it in InMotion Magazine.

But if you haven't seen the C-Leg up close and in action, we'd like to invite you to experience the RoadShow for a personal look at how the C-Leg and Compact (a new microprocessor knee from Otto Bock) deliver the security and reliability people need.

Instead of watching every step, you gain the freedom to enjoy the view.

You will have the opportunity to learn more about how the C-Leg and Compact work and hear from patients who have tried them.

RoadShow Agenda

Greeting/Welcome

C-Leg/Compact Presentation

- Features and Benefits
- How They Work

Patient Testimonials

Questions

December 15, 2005

1:00pm - 6:00pm

Wright & Filippis
23520 Woodward, Ferndale
