Upper Extremity Limb Loss Rehabilitation: An Advanced Course for Physicians & Therapists

This one-day course provides health care professionals with a comprehensive understanding of amputation levels, prosthetic options and pre and post therapy ideas for the upper extremity limb loss patient. The course emphasis is on the value of teamwork between

the physician, prosthetist, and therapist to improve patient outcomes.

Also discussed are the unique challenges faced by upper extremity amputees. In addition, healthcare professionals will also get hands-on lab practice using computer evaluation tools and prosthetic components.

Who Will Benefit:

- Physicians
- Occupational and Physical Therapists
- Case Managers
- Any health care professional involved in upper extremity limb loss rehabilitation

COURSE OBJECTIVES

- Provide a comprehensive discussion on upper extremity prosthetic options
- Participate in the clinical evaluation of several upper limb amputees
- Discuss and recommend the appropriate prosthetic components
- Participate in the amputees' trial use of advanced components
- Amputees discuss their challenges and acceptance of limb loss

INSTRUCTOR

Bambi Anderson, OTR/L

Bambi Anderson has been promoted to the role of Clinical Specialist in Upper Extremity Prosthetics at Otto Bock Health Care. Her role at Otto Bock includes instruction for the "Upper Extremity Limb Loss Rehabilitation" program for therapists. She has been a therapist for over 22 years with a clinical background ranging from pediatrics to trauma, hand therapy and general rehabilitation. Prior to her role in the Professional Services Department, Bambi spent four years as a sales representative for Otto Bock in the rehabilitation and O&P division.
